

Emergency Medical Technician

The primary focus of the Emergency Medical Technician is to provide basic emergency medical care and transportation for critical and emergent patients who access the emergency medical system. This individual possesses the basic knowledge and skills necessary to provide patient care and transportation. Emergency Medical Technicians function as part of a comprehensive EMS response, under medical oversight. Emergency Medical Technicians perform interventions with the basic equipment typically found on an ambulance. The Emergency Medical Technician is a link from the scene to the emergency health care system

Emergency Medical Technician Training

The EMT serves as a part of an EMS response system, assuring a progressive increase in the level of assessment and care. This course serves as an entry level program providing education in the assessment and care of patients with:

- Respiratory problems
- Cardiac problems
- Diabetic problems
- Strokes & Seizures
- Pediatric emergencies
- Childbirth & emergencies
- Trauma emergencies
- Bleeding emergencies

The EMT scope of practice includes basic skills focused on the acute management and transportation of critical and emergent patients. This course provides education in the following skills:

- Airway Management
- Cardiac Arrest Management
- Patient Assessment
- Patient Immobilization
- Emergency Service Operations

Hartford Hospital Training Program

Hartford Hospital EMS Education offers both day and evening programs throughout the year to accommodate student schedules. The EMT training program is taught by dedicated professionals representing all aspects of the Emergency Medical System. Together we represent over 150 years of pre-hospital knowledge. We have a consistent student success rate that exceeds the national average.

The students are given hands-on training with equipment and patients in real-life situations. The program also provides students with observation in an ambulance and in the emergency department.
