**AAOS Emergency Care and Transportation for the Sick and Injured, Tenth Edition**

**\*Cost of course does not include textbooks.**

Textbooks are available for purchase through EMS Education Department for an additional \$100.00.

**Prerequisites:**

You must be **16** years of age to become certified as an EMT in the State of Connecticut

This 190+ hour course is an entry level program that will train you to be an integral member of the pre-hospital team. The course provides instruction in basic life support skills such as CPR, airway management, treatment of bleeding control and shock recognition. In addition, we will cover: care for trauma victims, medical emergencies, OB/GYN, and pediatrics.

*During the program you will be required to complete 10 hours of observation time, separate from class time, at the Hartford Hospital Emergency Department and/or at a local ambulance service provider.*

Upon successful completion of the program, you will be eligible to take the certification exam from the National Registry of Emergency Medical Technicians (NREMT). Successful completion of the exam is required in order to be certified as an EMT in Connecticut. The examination fee is a separate fee, charged at the time of the exam and is not included in the tuition for the class.
